

Amendments to the Specification:

Applicant has enclosed a Substitute Specification. The specification has been amended to comply with PTO format requirements by including section headings and paragraph numbers as well as various additional formality matters. Enclosed are both a marked-up copy of the specification and a clean copy of the Substitute Specification.

Please insert the following as the new first paragraph in the application.

CROSS-REFERENCE TO RELATED APPLICATION

This is a 371 National Phase application of International Application No. PCT/GB2004/001282 filed on 23 March 2004 which claims priority to application Serial No. GB 0307317.8 filed on 29 March 2003.

Please delete the second paragraph on page 7 and replace with the following two new paragraphs:

The foregoing summary as well as the following detailed description of the preferred embodiment of the invention will be better understood when read in conjunction with the appended drawings. It should be understood, however, that the invention is not limited to the precise arrangements and instrumentalities shown herein. The components in the drawings are not necessarily to scale, emphasis instead being placed upon clearly illustrating the principles of the present invention. Moreover, in the drawings, like reference numerals designate corresponding parts throughout the several views.

The invention may take physical form in certain parts and arrangement of parts. For a more complete understanding of the present invention, and the advantages thereof, reference is now made to the following descriptions taken in conjunction with the accompanying drawings, in which:

Please insert the following as new paragraphs 2 and 3 on page 8:

Although the invention has been described with reference to specific embodiments, these descriptions are not meant to be construed in a limiting sense. Various modifications of the disclosed embodiments, as well as alternative embodiments of the invention will become apparent to persons skilled in the art upon reference to the description of the invention. It should be appreciated by those skilled in the art that the conception and the specific embodiment disclosed may be readily utilized as a basis for modifying or designing other structures for carrying out the same purposes of the present invention. It should also be realized by those skilled in the art that such equivalent constructions do not depart from the spirit and scope of the invention as set forth in the appended claims.

It is therefore, contemplated that the claims will cover any such modifications or embodiments that fall within the true scope of the invention.
